ABOUT ME

I am an active learner with a strong ability to start from the beginning when necessary. My strengths include exceptional communication, responsibility, commitment and I take ownership of what I do, effective decision-making, being a reliable team player, maintaining a positive attitude, and demonstrating persistence. I have a keen interest in Machine Learning (ML) and Web developing and problem solving.

SKILLS

Programming language	Python	Intermediate
	C	Working proficiency
Technology	Java	Working proficiency
	Machine Learning	Intermediate
	Springboot	Beginner
	Git	Beginner
DBMS	Database Management & SQL	
	MongoDB	
Language	English	Professional Proficiency
	Tamil	Native

EDUCATION

Kamaraj College of Enggineering and technology	B. Tech Information Technology	Aug,2022-Jun, 2026
CGPA: 7.8/10		
Sivakasi Nadars Matriculation Higher Secondary School.	Higher secondary Class XII	March,2022
- Percentage: 80% - Maths – Computer Science group		
Sivakasi Nadars Matriculation Higher Secondary School.	Secondary School Class X	March,2020
Percentage: 84%		

CERTIFICATIONS AND CO-CURRICULAR ACTIVITIES

- International Certification on Oracle Certified Foundation Associate JAVA
- Published Research Paper in 2025 Quantum Computing on Drug Discovery on IEEE International Research Journal on Advanced Engineering Hub(IRJAEH)
- Ethical Hacker in Cisco Academy
- Best Outgoing Student Award in School
- Best Sportsman award

INTERNSHIP

Futurik Technologies - FullStack and Cloud Hosting May, 2024

"I completed an internship in full-stack web development and cloud hosting, gaining hands-on experience in designing and implementing scalable web applications. I learned to deploy and manage web applications on cloud platforms. This internship enhanced my skills in web development and cloud computing."

Tools and Technologies used – HTML, CSS, Javascript,React,MangoDB,Bootstrap

PROJECTS

TurfTime – A Turf Booking WebApp

Developed TurfTime, a web application for booking turf slots and finding nearby turfs based on availability and timing. The platform enables users to book slots, view pricing, and manage bookings efficiently. TurfTime streamlines the process of finding and booking turfs, enhancing user experience and convenience.

Tools and Technologies used - MERN(MongoDB,Express.js,React,Node.js)

SkinSight – AI-Based Skin Cancer Detection System

Developed an AI-based dermatology system for automated skin lesion detection and classification using a hybrid CNN–SVM model. Integrated features like diagnostic report generation, risk scoring, and a chatbot for user support to enhance usability and interpretability. Achieved high performance on HAM10000 and ISIC datasets in terms of accuracy, precision, recall, and F1-score.

Tools and Technologies used – HTML, CSS, JavaScript, React.js (Vite), Node.js, Express.js, MongoDB, REST APIs, Python, TensorFlow/Keras, OpenCV, Scikit-learn, CNN, SVM

Custom Dashboard Builder with Customer Order Management

Developed a dynamic dashboard builder enabling users to create personalized dashboards using drag-and-drop widgets such as charts, tables, and KPI cards. Implemented real-time data integration with a Customer Order module, including order creation, validation, and data-driven visualizations with filtering options. Designed a fully responsive grid-based layout supporting desktop, tablet, and mobile devices with widget configuration, resizing, and interactive features.

Tools and Technologies used – React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, Tailwind CSS, REST APIs, Recharts
